DIRECTOR'S SPEECH

Gifial Fauzi Sadiki

Director

Praise be to Allah SWT, for His blessings and guidance that have granted me the trust to serve as the Director of Geojaya Teknik.

Across generations since its establishment in 1974, PT Geojaya Teknik has grown from a local Surveying and Mapping Service Company into a National Company with various expansions in scientific fields. The company's consistency since its inception until today has contributed significantly to supporting sustainable national development.

Amid evolving trends and increasing demands, we uphold the principles of excellence, consistency, adaptability, professionalism, and competitiveness through the utilization of technology.

With a spirit of youthfulness, I am committed to leading PT Geojaya Teknik toward becoming a multinational company built upon strong corporate values— including high commitment to principles in working with stakeholders, a results-oriented approach supported by sustainable partnerships, consistency and adaptability shaped through decades of experience, and professionalism reflected in every aspect of our work.

Finally, we welcome all stakeholders to collaborate with us in advancing national development through PT Geojaya Teknik.

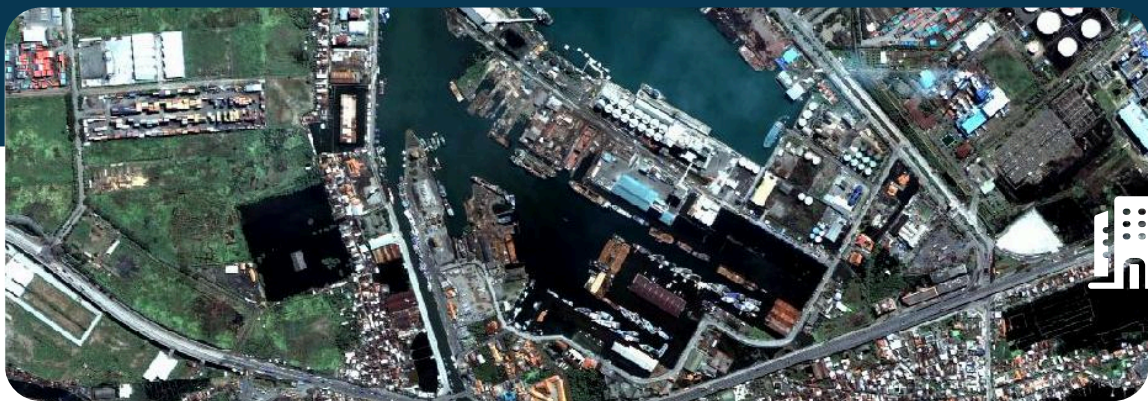

Warm regards,
PT Geojaya Teknik

PT GEOJAYA TEHNIK
Company

About Us

PT Geojaya Teknik is a leading Indonesian company in **surveying, mapping, geospatial consulting, and IT-based solutions.**

Established in **1974**, we have grown from a local survey and mapping provider into a **national leader** and are now ready to expand our services to **the wider ASEAN region.**

A Trusted Geospatial & Surveying Partner

With more than **50 years** of experience, we combine expertise, technology, and innovation to deliver reliable solutions for governments, corporations, and international partners.

PT Geojaya Teknik delivers precise and innovative geospatial solutions through a combination of surveying expertise and modern mapping technology. Trusted by government and private sectors, we are committed to bringing international-standard results to Malaysia and the ASEAN region.

Vision & Mission

Vision

To become a leading and trusted company in geospatial, mapping, and surveying services across Southeast Asia.

Mission

To provide competitive and creative solutions in the fields of surveying, mapping, and consulting services, based on multinational standards and driven by innovation, consistency, and core professional values.

We are committed to adapting to change, maintaining professional integrity, and optimizing the use of science and technology to deliver sustainable results.

Corporate Culture

Commitment

We uphold strong commitment and integrity in every partnership and decision-making process, ensuring trust and long-term collaboration with all stakeholders.

Customer Satisfaction

We focus on delivering high-quality results while maintaining sustainable relationships that ensure continuous client satisfaction.

Experience

With consistency and adaptability since 1974, we bring decades of proven experience and deep industry knowledge to every project we handle.

Professionalism

Our team embodies capability, integrity, teamwork, and loyalty — reflecting true professionalism in every aspect of our work.

Our Services

Environmental and Forestry Sector

MINE RECLAMATION

A service that focuses on restoring former mining areas through land recontouring, environmental rehabilitation, and re-vegetation. This process ensures that post-mining land becomes safe, stable, and compliant with environmental standards. The objective is to restore ecological functions and minimize environmental impacts after mining activities.

ENVIRONMENTAL ASSESSMENT (AMDAL & UKL-UPL)

Environmental Assessment services (AMDAL & UKL-UPL) involve the preparation of environmental documents that include impact identification, management plans, and monitoring plans to ensure that a project complies with environmental permitting requirements. This service ensures that activities can operate safely, in a controlled manner, and in accordance with applicable regulations.

Our Services

Environmental and Forestry Sector

WATERSHED (DAS) REHABILITATION

This service includes restoring degraded and critical land conditions within a watershed area through activities such as reforestation, erosion control, and water management improvement to enhance the area's ecological functions. The objective is to restore land cover, maintain environmental quality, and support the sustainability of water resources within the watershed.

FOREST AREA BORROW-USE PERMIT (IPPKH)

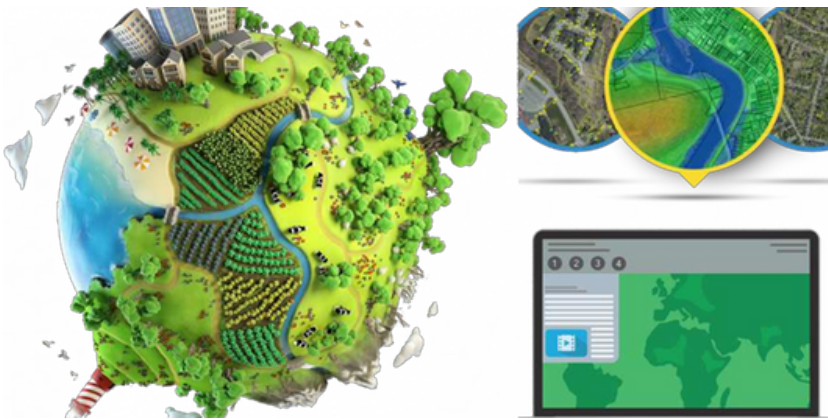

This service includes technical and administrative assistance in the process of obtaining an IPPKH permit, starting from the preparation of application documents, fulfillment of technical-environmental requirements, to coordination with forestry authorities. The objective is to ensure that activities requiring the use of forest areas can obtain legal permits in accordance with regulations and meet the requirements for forest area protection.

Our Services

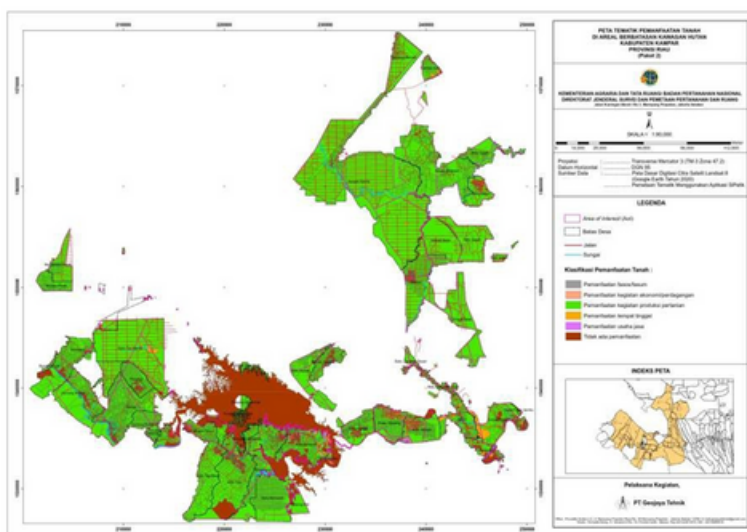

Survey and Mapping Sector

GIS & REMOTE SENSING

A service for producing spatial information data within a single digital map (Geodatabase) using remote sensing with high-resolution satellite imagery.

THEMATIC

Mapping services based on specific thematic requirements according to client needs, such as the development of P4T maps (Land Ownership, Control, Use, and Utilization).

Our Services

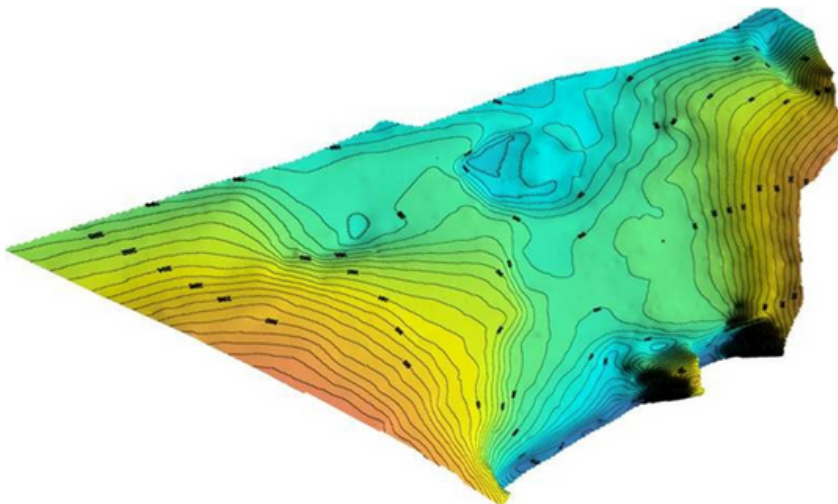

Survey and Mapping Sector

PHOTOGRAMMETRY

Mapping services using aircraft or drones to produce high-resolution imagery with wide area coverage.

HYDROGRAPHY

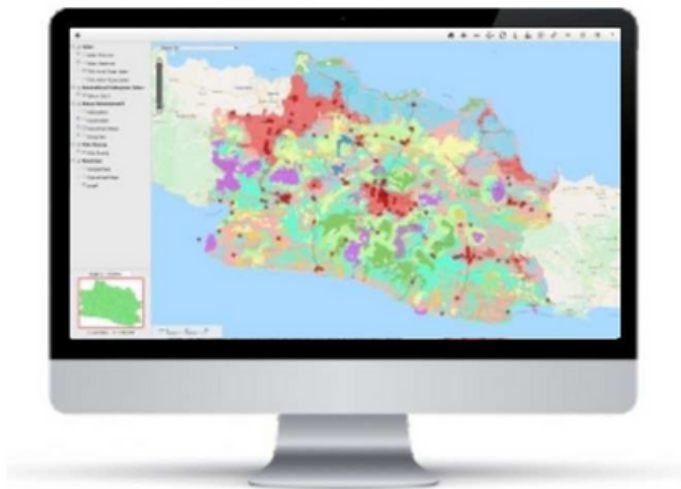

Underwater mapping services covering coastal surveys, depth mapping, offshore surveys, currents, tides, waves, and other marine applications.

Our Services

Survey and Mapping Sector

IT / TELEMATICS

Services include the development of applications, websites, digitalization, asset mapping, data archiving, and other customized solutions based on client requirements.

DISASTER RISK ASSESSMENT

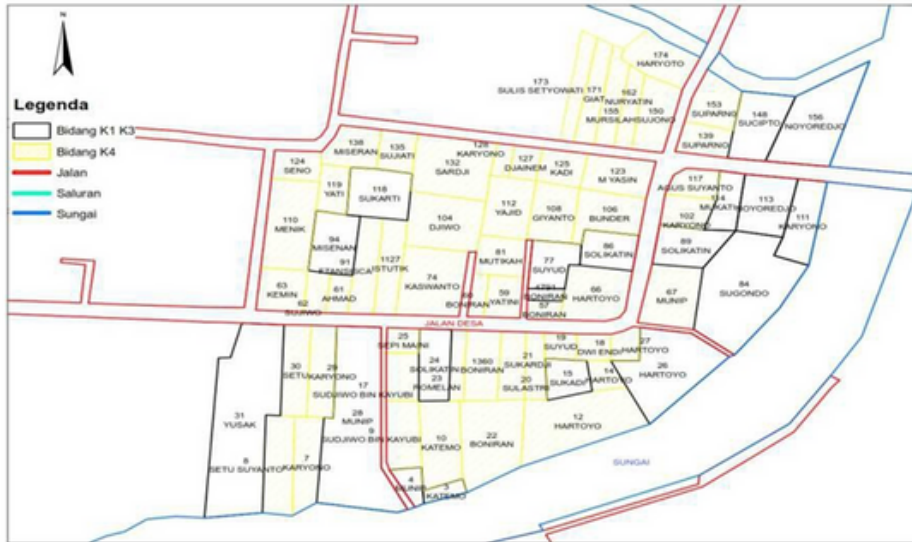

Services include the preparation of Disaster Risk Assessment studies for designated locations, as well as the development of Risk Maps (hazard maps, vulnerability maps, and capacity maps).

Our Services

Survey and Mapping Sector

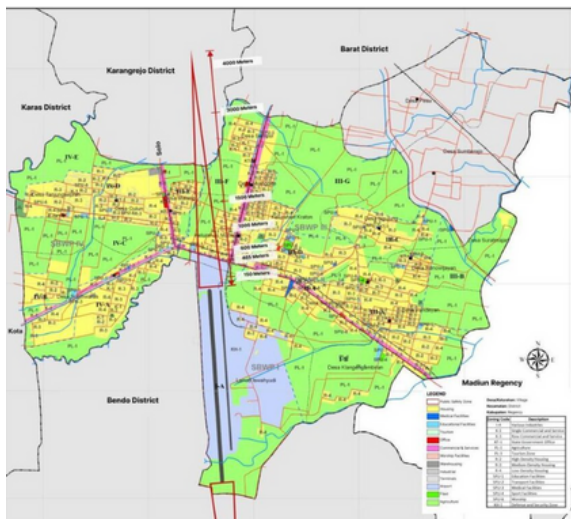

CADASTRAL

Mapping services for land registration, land administration, and land asset management.

Spatial & Regional Planning Sector

DETAILED SPATIAL PLANNING

Planning services focused on the preparation of Detailed Spatial Plans (RDTR) and supporting technical studies to guide land use control, zoning regulations, and development implementation at the city and district levels.

Our Services

Spatial & Regional Planning Sector

STRATEGIC AREA & NATIONAL ACTIVITY CENTER PLANNING

Planning services for National Strategic Areas (KSN) and National Strategic Activity Centers (PKSN), particularly in border and priority development regions.

LAND USE PLANNING & ZONING ANALYSIS

Source: The Food and Agriculture Organization of the United Nations. DATA.FAO.ORG/MAP

Analysis and planning of land use patterns and zoning regulations to ensure sustainable, efficient, and legally compliant spatial utilization.

Our Services

Spatial & Regional Planning Sector

URBAN & REGIONAL DEVELOPMENT PLANNING

Comprehensive planning services supporting urban and regional development, integrating spatial planning with economic, social, and infrastructure considerations.

BORDER AREA & SPECIAL REGION PLANNING

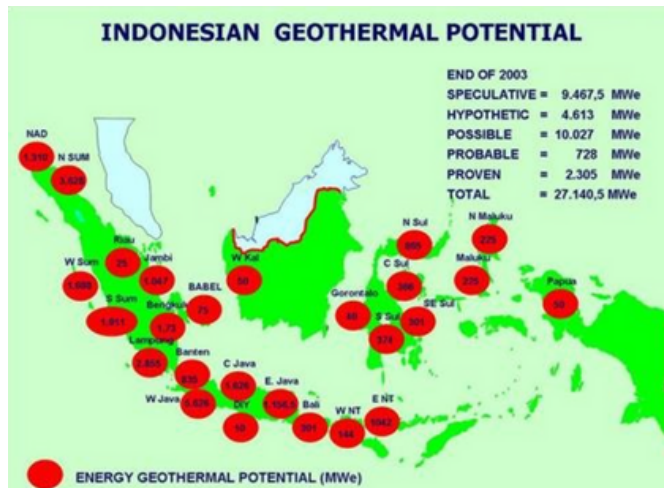

Specialized spatial planning for border regions and special strategic areas, addressing security, accessibility, regional equity, and cross-border connectivity.

Our Services

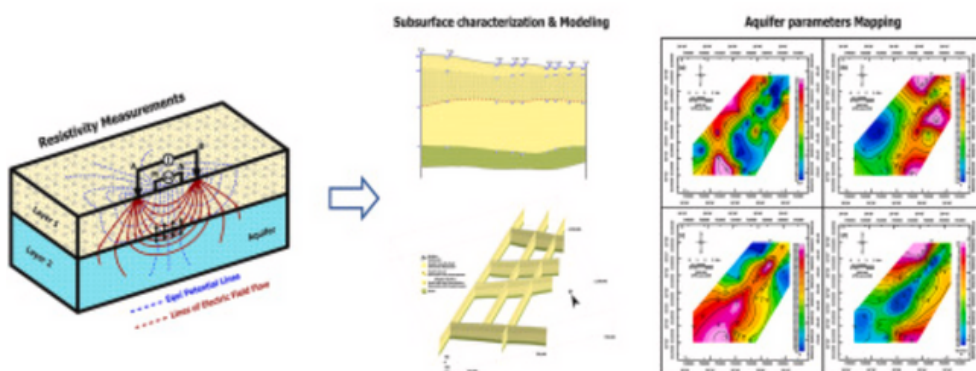

Infrastructure & Energy Survey Services

GEO THERMAL & RENEWABLE ENERGY SURVEY

Survey services supporting the development of geothermal and renewable energy projects, providing accurate spatial, topographic, and subsurface data for exploration, drilling, and infrastructure planning.

GEO PHYSICAL & GEOELECTRICAL SURVEY

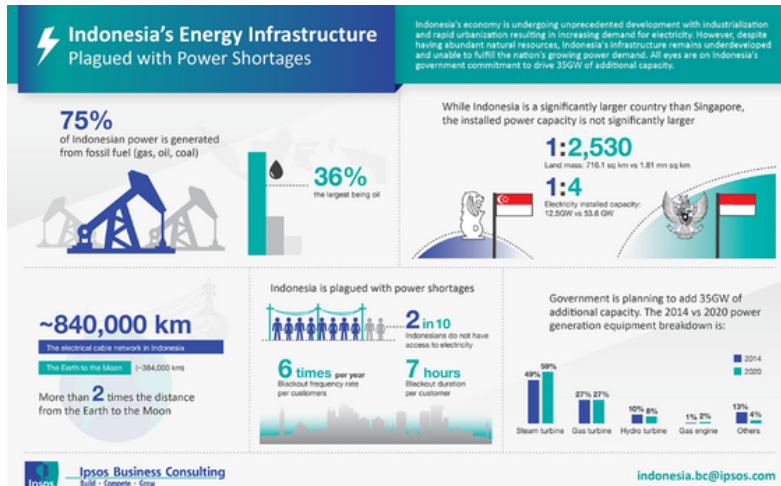

Subsurface investigation services using geophysical and geoelectrical methods to identify groundwater potential, geological structures, and subsurface conditions for energy, water resources, and hazard assessment.

Our Services

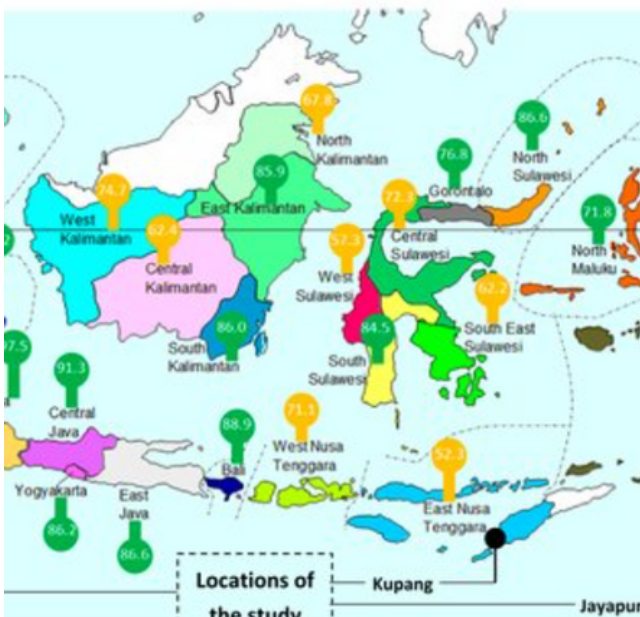

Infrastructure & Energy Survey Services

ENERGY INFRASTRUCTURE PLANNING SUPPORT

Survey-based technical support for energy infrastructure planning, integrating field data with engineering and spatial analysis to support feasibility studies, FEED, and detailed planning stages.

UTILITY & FACILITY ELECTRICAL SURVEY

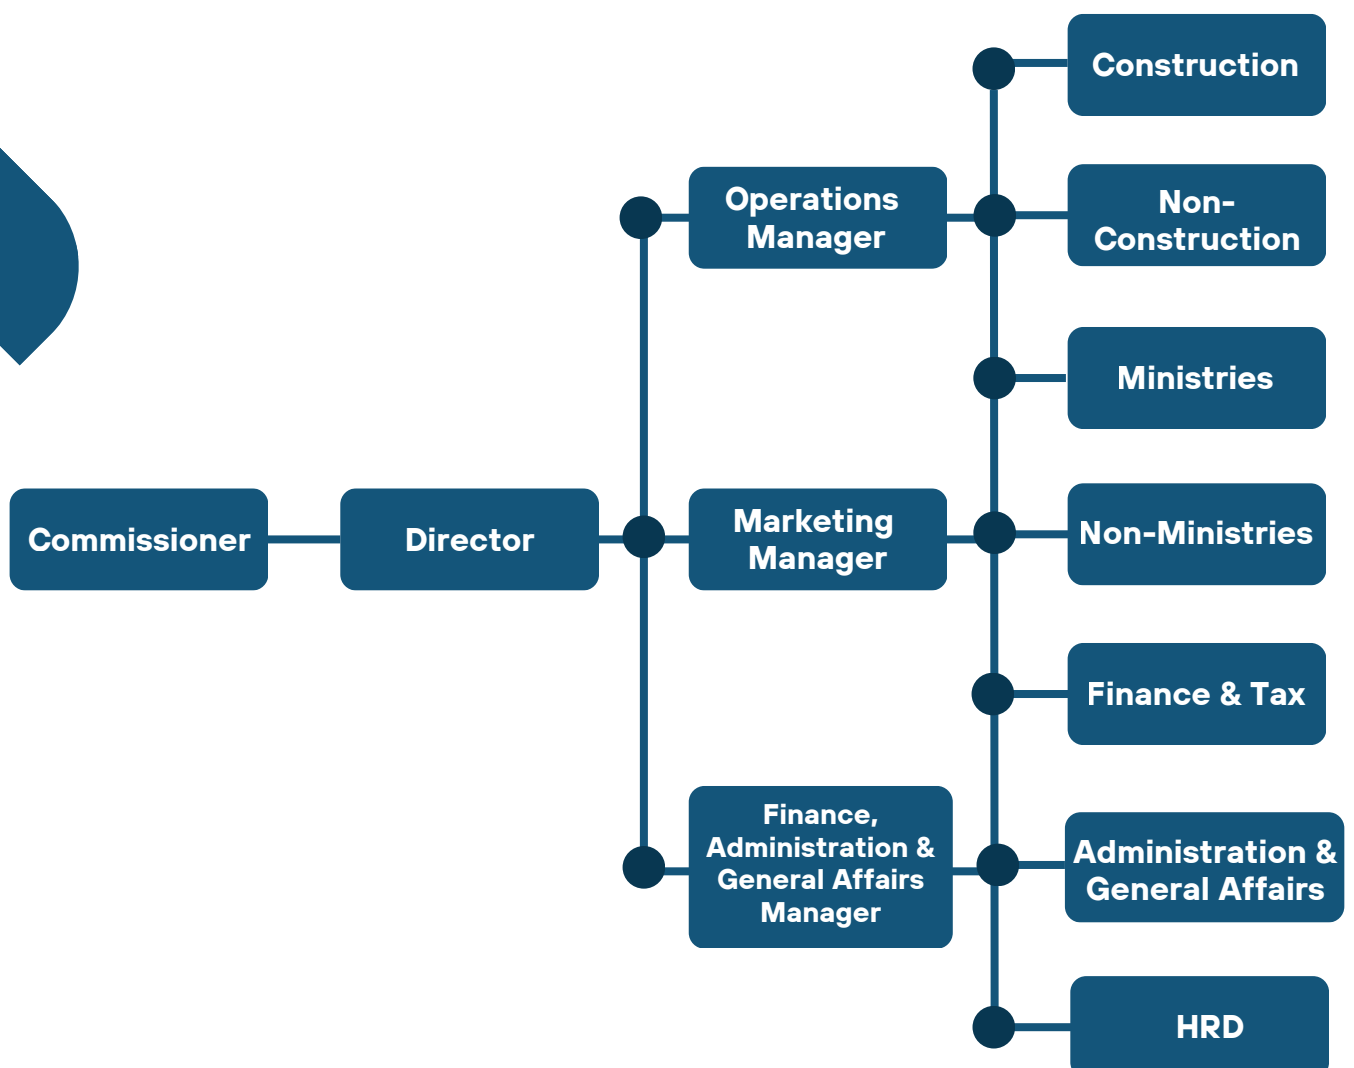

Assessment and survey services for electrical systems in buildings and facilities, ensuring system reliability, safety, and compliance with technical standards.
